DETAILED ACTION

Response to Amendment

1. Applicant has amended claims 1 and 18 to overcome the previous rejection. Therefore, the rejection of claims 1-7, 9, 18, 20 and 23 has been withdrawn. Applicant has also canceled claims 24 and 25, and added claims 26 and 27. Claims 11-17 were previously indicated to be allowable.

Allowable Subject Matter

2. Claims 1-7, 9, 11-18, 20, 23, 26 and 27 are allowed.
3. The following is an examiner's statement of reasons for allowance: a search of the prior art failed to disclose or reasonably suggest a semiconductor device comprising a substrate, a passivation layer formed overlying at least a portion of the substrate, a fuse formed overlying the passivation layer; and a packaging material formed in contact with an entire length of the fuse (claim 11) or in contact with an entire surface of the fuse (claims 1 and 18).

Kono '756 discloses a semiconductor device, comprising: a substrate (fig. 1, 102) having a first circuit formed therein (col. 6, lines 34-37; row decoder), a second circuit formed therein (column decoder), and a fuse (fig. 1, 130); wherein the fuse is formed overlying and in contact with the passivation layer; and a packaging material formed in contact with over the fuse (col. 11, lines 33-39; fuse is opened and entire chip is packaged in resin, thus covering the exposed areas of the fuse show in fig. 1), wherein the packaging material is selected from the group consisting of a mold compound

(resin) and an underfill; but Kono does not teach limitations of claims 1, 11 and 18 as described above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
